

TECNOPOLIS wardrobe system

The TECNOPOLIS wardrobe system was designed in 1990 and is one of the few wardrobe systems supported by an aluminium frame: it is lightweight and flexible and practically non-deformable.

The aluminium supporting frame makes it quick and easy to assembly and disassemble the wardrobe every time you move house as well as avoiding the typical instability of wardrobes with wooden bases that must be continuously adjusted. Moreover, this system allows the bottom panel to be removed, making it easy to clean the wardrobe even in the most inaccessible areas.

ALIBI door

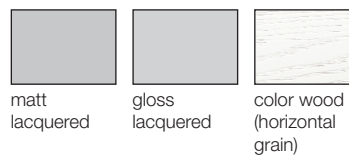

The swing Alibi door is composed of:

- a 30 mm thick honeycomb-core panel;
- a 5 mm thick, matt lacquered, gloss lacquered, wood, mirrored, color wood, stone, gold or silver leaf wood laminate insert.

N.B.: NOT AVAILABLE FOR CORNER AND END DOORS
